Welcome Message

The Egyptian Society of Chest Diseases and Tuberculosis is deeply honored to invite you as a distinguished guest to share and attend the 62nd annual meeting.

This year will be truly an outstanding gathering for the Middle East and the Arab World, of continuous giving, caring, and partnership.

The annual meeting is the biggest event for pulmonologists in Egypt and the Arab World and we promise to make this year truly special. Our meeting aims at updating chest physicians with recent knowledge given by highly experienced professors.

We hope that our colleagues in the different organizations in Egypt and the Arab area share with their scientific material and interact with our guest faculties which will include eminent international Arab and Egyptian scientists, with the prospect of exchange of knowledge for better continuous education and optimum patient care.

ANVIZIRAM

ANVIZIRAM 4 DAYS

The proven effective and tolerated treatment of new and re-emerging influenza virus infections.

Anviziram
Favipiravir 200 mg
40 Film Coated Tablets
For Healthcare Professionals Only

FACE Idiopathic Pulmonary Fibrosis

HEAD ON

OFEV® nintedanib
150 or 100 mg Soft Gelatin Capsules

PIC adapted from ref.2

INPULSIS trial eligibility criteria based on high-resolution computed tomography. Criteria B and C met. Criterion B was the presence of reticular abnormality and traction bronchiectasis consistent with fibrosis with basal and peripheral predominance, and criterion C was the absence of atypical features, specifically nodules and consolidation, with ground glass opacity, if present, being less extensive than a reticular opacity pattern. 2

OFEV 150 mg twice daily reached statistical significance in reducing risk of disease progression by 47% (p=0.0001) in INPULSIS 1 trial in patients with IPF. 3

OFEV 150 mg twice daily significantly reduces the risk of acute IPF exacerbations by 62% over 52 weeks in INPULSIS 2 trial. 3

In the pre-specified pooled analysis of survival data of the INPULSIS trials, the results of all survival endpoints (such as on-treatment mortality and respiratory mortality) showed a consistent numerical difference in favour of OFEV. 3

Dosing regimen: 100 mg or 150 mg twice daily 1

EM-EG-100110
